

MUELLER® Series R-2361-6 OS&Y Resilient Wedge Valve

18" – 24" • Ductile Iron • 175 PSIG Working Pressure

Forged Bronze Stem

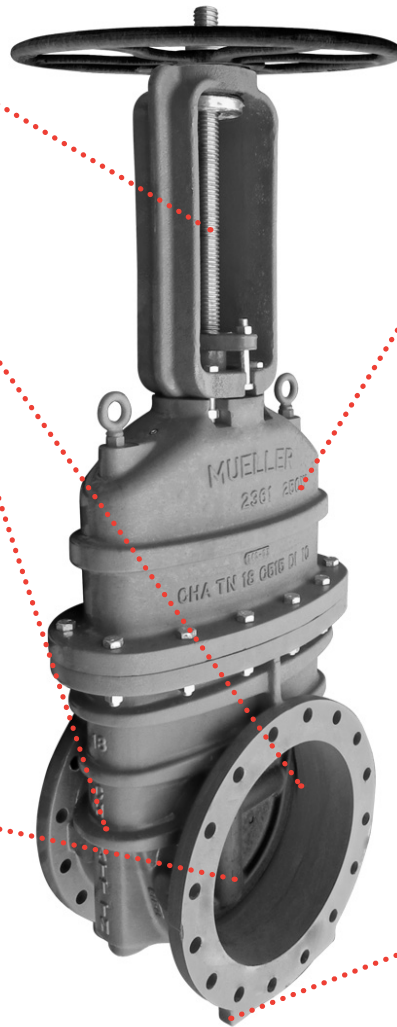

Superior strengthened stem for less maintenance.

Guide Cap Bearings

Guide cap bearings are made of polymer and snapped over rubber covered wedge guides, provide bearing surfaces that protect both wedge and interior body coating from wear and aid in easy operation – even the largest valves installed horizontally. Rollers, tracks or scrapers are not needed.

100% Elastomer Encapsulated Wedge

No thin spots, voids or uncoated areas for superior corrosion resistance.

Epoxy Coating

Superior fusion-bonded powder epoxy inside and out, 10 mils nominal. AWWA C550 compliant.

UL Listed

Rated at 175 PSIG maximum working pressure. Hydrostatically tested at 500 PSIG. NSF 61 certified.

American Made Quality

Made in Chattanooga, Tennessee plant certified to ISO 9001.

Flat Bottom Surfaces

Stands upright for easier handling and storage.
