INSTA-TITE™ 2.0 CONNECTION

Fast, easy, and strong connections
for CTS, IPS, and IPS PE Pipe.

The Insta-Tite 2.0 connection simplifies making connections to PE tubing, Copper tubing, PEP pipe and PVC pipe without the need for wrenches. Stab-fittings allow the user to push the pipe into the end of the connection and have a secure installation. The new Insta-Tite 2.0 design does not require beveling PVC pipe.

Trusted stab-fitting for water distribution, now with copper capabilities, the Insta-Tite 2.0 connection helps to decrease installation time and provide a stronger connection.

EASE OF USE

- > Stab the pipe firmly into the connection.
- > No heating, flaring, threading, cementing, nut tightening, or liner required. Working pressure is equal to the fitting or pipe connected to the adapter.

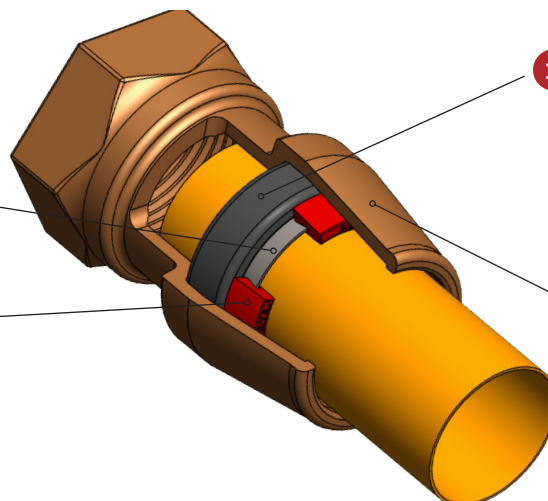

RELIABILITY

- > "One-way" stainless steel grip ring lets pipe stab-in easily yet prevents pullout
- > Provides high resistance to external forces such as line movement, backfilling or accidental disturbances
- > Internal gasket provides positive leak-tight seal

PROVEN PERFORMANCE

- > Mueller has conducted extensive testing on the Insta-Tite 2.0 Connection Design:
- > Insta-Tite 2.0 Connections are designed for CTS O.D. tubing or IPS pipe.

- 1 Stainless Steel Grip Rings**
"One-way" stainless steel grip ring lets pipe stab-in easily yet prevents pullout
- 2 Easy Identification**
Color-coded guide rings identify CTS or IPS capability

- 3 Leak-Tight Seal**
Resilient gasket provides positive leak-tight seal
- 4 Brass Body**
Strong brass body resists corrosion
